

**FABTECH SPECIAL (OFFER VALID TO DECEMBER 31, 2023)**

# No-Risk, Existing Tool Optimization Package

Do you have a tri-axis transfer press that is currently at or near capacity?

Would you like to reduce overtime hours and have time for preventative maintenance?

Do you simply want to keep your equipment from being beaten by running smoother curves?

**T-SIM Solutions is now offering a No-Risk, Existing Tool Optimization Package for (3) jobs currently running production at your facility.**

## OUR COMMITMENT TO YOU

We take all the risk!

We will guarantee a \*10% Average Increase in SPM or the ENTIRE project is FREE!

*\* Average increases are typically in excess of 15-25% on existing tool optimizations.*

## YOUR COMMITMENT TO US

You get the results or you don't pay!

Up to (5) hr. of collaborative time per job from your team to collect the necessary information for the press and jobs, Teams meeting to review results, and an opportunity to be present in the plant to implement new settings on the projects.

## What's the cost?

**\$5,000 per project. Period.**

Issue us a PO for the (3) projects, and we will only invoice after we've delivered on the increase in SPM.

**The end result is you have a higher SPM and smoother curves...  
GUARANTEED!**
